

CBO's Recent Publications and Work in Progress as of September 30, 2022

October 2022

To provide the Congress with a comprehensive review of its work, the Congressional Budget Office publishes quarterly reports, like this one, highlighting recent work and summarizing work in progress.¹

Recent Work

Over the past three months, CBO has provided a variety of budget and economic analyses, fulfilling the agency's core mission of supporting the Congress during each stage of the legislative process.

The agency has published 205 cost estimates for legislation that was reported by a committee or that was the subject of a motion to be placed on the consensus calendar. [One](#) of those cost estimates was for the 2022 reconciliation act (Public Law 117-169). That publication included estimates for roughly 150 different provisions, including ones putting in place a new alternative minimum tax on corporations, additional funding for the Internal Revenue Service, a requirement that Medicare negotiate prices of certain prescription drugs, enhancement of health insurance subsidies established by the Affordable Care Act, and subsidies for renewable energy. Another [cost estimate](#) was for a law that addresses various matters related to veterans who were exposed to toxic substances during military service, the Honoring Our PACT Act of 2021 (P.L. 117-168). In addition, CBO [estimated](#) the cost of a law that provides funds to support the domestic production of semiconductors and authorizes various programs and activities of the federal science agencies, the CHIPS Act of 2022 (P.L. 117-167).

Aside from cost estimates of legislation, CBO released [estimates](#) of the costs of the President's executive actions that suspend student loan payments and cancel some student loan debt.

Since its last quarterly report on work in progress, CBO has released 18 reports, working papers, and other analytic products (see Table 1 on page 5). Some of those publications provided analysis of the economic and budgetary situation.

On July 27, the agency published its budget projections and economic forecast for the next 30 years in [The 2022 Long-Term Budget Outlook](#). Along with that report, the agency provided a [description of its population projections](#) that underlie both the baseline budget projections and economic forecast that CBO published in May 2022 and its long-term projections.

1. For the previous report, see Congressional Budget Office, *CBO's Recent Publications and Work in Progress as of June 30, 2022* (July 2022), www.cbo.gov/publication/58153.

The agency also published two reports that analyzed proposals in the President's budget for fiscal year 2023. On July 1, CBO published *An Analysis of the Discretionary Spending Proposals in the President's 2023 Budget*, which compared those proposals with their counterparts in CBO's most recent baseline projections. Then, on September 13, the agency released a more comprehensive analysis of the President's budget.

In addition, a number of other products described the budgetary situation. The agency published its annual report on programs whose authorizations of appropriations have expired or will expire soon. Each month since the previous update on work in progress, CBO issued its *Monthly Budget Review*, which is an analysis of federal spending and revenues for the previous month and the fiscal year to date. CBO also released a set of infographics illustrating the composition of the federal budget in 2021.

The agency published two interactive tools:

- One that allows users to explore the effects of policies that would raise the federal minimum wage and
- One that allows users to simulate the agency's process for projecting discretionary budget authority and outlays for different types of spending over the course of 10 years.

Other publications presented analyses to inform policy discussion and debate:

- An analysis of policy approaches that aim to reduce the prices paid by commercial health insurers for hospitals' and physicians' services;
- An overview of the federal response to the abuse of opioids;
- A visual report describing trends in the distribution of family wealth;
- A working paper describing CBO's small-scale model for analyzing the macroeconomic effects of policy changes;
- A report examining how inflation has affected households at different income levels since 2019;
- A report examining the mechanisms by which quantitative easing—large asset-purchasing programs conducted by the Federal Reserve—affects the federal budget deficit;
- An assessment of the issues involved in pricing emissions of methane from oil and gas; and
- A report presenting CBO's revenue and outlay projections for 2022 to 2032 translated to the receipts and expenditures used in the framework for the national income and product accounts (maintained by the Bureau of Economic Analysis).

In addition, CBO published letters responding to questions from Members of Congress, providing more information on cost estimates and other analyses. Some of those letters included:

- Answers to questions about the costs of student loans since 2010;
- Additional information about increased enforcement by the Internal Revenue Service;
- Additional information about prescription drug legislation;

- [Responses](#) to questions about H.R. 5376, the Inflation Reduction Act of 2022, and broader economic conditions;
- [Responses](#) to questions about cancer drugs;
- [Responses](#) to questions about the budgetary costs of higher interest rates and inflation;
- [Responses](#) to questions about the effect of the Pension Benefit Guaranty Corporation's final rule on special financial assistance; and
- Additional [information](#) about how the certification provision in the INSULIN Act would affect the prices for insulin and the federal budget.

Work in Progress

As of September 30, CBO was working on 303 cost estimates for legislation that had been ordered reported by a committee or that was the subject of a motion to be placed on the consensus calendar (see Table 2 on page 6). In addition, the agency was working on 20 analytic products that it expected to complete in the coming months.

Three recurring reports were in progress as of September 30:

- *Monthly Budget Review: September 2022* (to be released on October 11);
- *Options for Reducing the Deficit*, which will be published near the end of this year; and
- *The Accuracy of CBO's Budget Projections for Fiscal Year 2022*, which will also be published near the end of this year.

One requested product was in progress as of September 30: a chart book updating CBO's ongoing analysis of the distribution of household income, means-tested transfers, and federal taxes (adding information for 2019, the most recent year for which the detailed tax data needed for the analysis were available).

CBO has many other products in the research, drafting, and editing stages that support its mission of furnishing the Congress with timely analysis of policy issues.

One product that was in progress as of September 30 and has since been released (on October 4) is an [explanation](#) of why CBO applies a revenue offset to estimates of changes in excise taxes and certain other taxes. Other ongoing products that will provide microeconomic or tax analysis are these:

- A description of trends in greenhouse gas emissions from the electric power sector,
- An overview of the role of the transportation sector in contributing to greenhouse gas emissions, and
- A description of the factors that explain observed patterns in the economic profits of corporations and federal corporate income taxes over recent decades.

Some products will provide analyses of national defense issues, including an analysis of the fuel prices paid by the Department of Defense.

Other products will explain or support the analytic methods used in CBO's work and budgetary estimates or provide background information:

- A report about how federal revenues and outlays respond to cyclical movements in the economy;
- A primer on the fiscal measures CBO considers when constructing its long-term budget analysis;
- A working paper analyzing how the amount physicians are paid for services affects access to care for dual-eligible beneficiaries (people dually enrolled in Medicare and Medicaid) compared with Medicare-only beneficiaries;
- A working paper describing the role of defined benefit and defined contribution wealth plans in the distribution of family wealth;
- A working paper describing the methods CBO is developing to analyze policies' different effects on people across the income distribution; and
- A working paper analyzing the welfare effects of debt.

A list of CBO's forthcoming analytic reports and all of its published reports are available on the agency's website.²

The Congressional Budget Office prepares this report each quarter to help keep the Congress informed about the agency's work. Daniel Fried prepared this edition with guidance from Leigh Angres and with contributions from many people at CBO. Fiona Forrester compiled the list of pending cost estimates. Jeffrey Kling reviewed the report, and John Skeen edited it.

The report is available at www.cbo.gov/publication/58064. CBO seeks feedback to make its work as useful as possible. Please send comments to communications@cbo.gov.

Phillip L. Swagel
Director
